Around 50 workshops were conducted in Hong Kong starting from January 2009. There was excellent acceptance from the participants. 95% of them have no hesitation to refer the workshop to friends.

This is a challenging and intellectually demanding workshop specially designed for executives, professionals and leaders. In complete darkness, participants will be guided by visually impaired trainers to experience a 2-hour task-filled session.

A professional facilitator will then guide the participants through a 1-hour after-darkness reflection, in which participants could share their insights and learn from each other.

The workshop will enable participants:

- To face up to uncertainties and embrace challenges
- To become innovative in unusual circumstances
- To reflect on the traditional way of communication
- To arouse empathy in working environments
- To enhance team spirit in challenging times
